NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL SEARCH REPORT OR THE DECLARATION

Germany	(PCT Rule 44.1)		
Clev v. a. /	Date of mailing (day/month/year) 0 3	-06-2004 TU3	YOU
Applicant's or agent's file reference 5/828 WC	FOR FURTHER ACTION See par	ragraphs 1 and 4 below	PC SE
International application No. PCT//BO3/04140	International filing date (day/month/year)	12003	
Applicant Nokia Corporation	etal		
			_]
1. The applicant is hereby notified that the internation	onal search report has been established and is t	ransmitted herewith.	1

I.	124		int is necessy notified due to the transfer of the second	
		Filing of a	mendments and statement under Article 19: unt is entitled, if he so wishes, to amend the claims of the international application (see Rule 46):	
		When?	The time limit for filing such amendments is normally two months from the date of transmittal or the international search report.	
		Where?	Directly to the International Bureau of WIPO, 34 chemin des Colombettes 1211 Geneva 20, Switzerland, Facsimile No.: (41-22) 740.14.35	
			e detailed instructions, see the notes on the accompanying sheet.	
2.		The application Article 17(ant is hereby notified that no international search report will be established and that the declaration under 2)(a) to that effect is transmitted herewith.	
3.		With regar	rd to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:	
<i>J</i> .			protest together with the decision thereon has been transmitted to the International Bureau together with the licant's request to forward the texts of both the protest and the decision thereon to the designated Offices.	
		no c	lecision has been made yet on the protest; the applicant will be notified as soon as a decision is made.	
4.	Rem	inders		
Shortly after 18 months from the priority date, the international application will be published by the International Bureau. If t applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority clair must reach the International Bureau as provided in Rules 90bis. 1 and 90bis. 3, respectively, before the completion of the technic preparations for international publication.				
Within 19 months from the priority date, but only in respect of some designated Offices, a demand for internation examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from date (in some Offices even later); otherwise, the applicant must, within 20 months from the priority date, perform acts for entry into the national phase before those designated Offices.				
	In re	spect of other	r designated Offices, the time limit of 30 months (or later) will apply even if no demand is filed within 19 months.	
	See	the Annex to	Form PCT/IB/301 and, for details about the applicable time limits, Office by Office, see the PCT Applicant's I, National Chapters and the WIPO Internet site.

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference 51828 WO	FOR FURTHER see Form PCT/ISA/220 ACTION as well as, where applicable, item 5 below.					
International application No.	International filing date (day month year) (Earliest) Priority Date (day month year)					
PCT/IB 2003/004140	24 Sept 2003					
Applicant						
Nokia Corporation et al						
This international search report has applicant according to Article 18. A	been prepared by this International Searching Authority and is transmitted to the copy is being transmitted to the International Bureau.					
This international search report consi						
	y a copy of each prior art document cited in this report.					
1. Basis of the report						
 a. With regard to the language, the in the language in which it was 	he international search was carried out on the basis of the international application s filed, unless otherwise indicated under this item.					
The international se furnished to this Au	earch was carried out on the basis of a translation of the international application thority (Rule 23.1(b)).					
	otide and/or amino acid sequence disclosed in the international application, see Box					
2. Certain claims were found	d unsearchable (see Box No. II)					
3. X Unity of invention is lack	ing (see Box No. III)					
4. With regard to the title,	4. With regard to the title,					
X the text is approved as su	X the text is approved as submitted by the applicant.					
the text has been establis	shed by this Authority to read as follows:					
(
,						
5. With regard to the abstract,						
x the text is approved as su	ubmitted by the applicant.					
the same has been establis	thed, according to Rule 38.2(b), by this Authority as it appears in Box No. IV. The need to mailing of this international search report, submit					
6. With regard to the drawings,						
a. the figure of the drawings to be	e published with the abstract is Figure No3					
x as suggested by the	applicant. Authority, because the applicant failed to suggest a figure.					
	Authority, because this figure better characterizes the invention.					
i <u>L</u>	be published with the abstract.					
b. I none of the figures is to t	be buousned with the apparate

PCT/IB 2003/04140

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)				
This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:				
2. Claims Nos.:				
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:				
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)				
This International Searching Authority found multiple inventions in this international application, as follows:				
see extra sheet				
1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.				
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.				
3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:				
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-5,8-23				
Remark on Protest				
No protest accompanied the payment of additional search fees.				

International application No. PCT/IB 2003/04140

Box No. IV Text of the abstract (Continuation of item 5 of the first sheet)

The following separate inventions were identified:

- 1. Claims 1-5, 11-14 describe a method for generating game control data on the basis of context data where the context data comprises sensor data.
- 2. Claim 6 describes a method for generating game control data on the basis of context data where the context data comprises music data.
- 3. Claim 7 describes a method for generating game control data on the basis of context data where the context data comprises visual data.
- 4. Claim 8-10 describes a method for generating game control data on the basis of context data where the context data is used to control the timing, events and actions of the game.
- 5. Claims 15-23 describe a method for generating game control data on the basis of context data where a first processor is used for executing the game and a second processor is used for generating game control data.

Due to the lack of unity, only the first invention described in claims 1-5 and 11-14 is required to be searched by the authority. However, since it was possible to carry out a search of inventions 4 and 5 as well, without effort justifying any extra fees, these inventions are also included in the report. Therefore, a search has been carried out of inventions 1, 4 and 5 as defined in claims 1-5, 8-23.

The present application has been considered to contain 5 inventions which are not linked such that they form a single general inventive concept, as required by Rule 13 PCT for the following reasons:

The single general concept of the present application is a method for generating game control data on the basis of context data.

Document US 5001632 discloses a method for generating game control data on the basis of context data. Thus, the single general concept is known and cannot be considered as a single general inventive concept in the sense of Rule 13.1 PCT.

.../...

International application No. PCT/IB 2003/04140

No other features can be distinguished which can be considered as same or corresponding special technical features in the sense of Rule 13.2 PCT.

Thus, the application lacks unity of invention.
